

Spray Satin™ NON-SILICONE FINISH

DESCRIPTION

SPRAY SATIN'S super high-gloss treatment renews, beautifies and protects quickly and easily. Deluxe NON-SILICONE formula sprays on clear, does not drip and is PAINT SHOP SAFE. Leaves behind a uniform, rich luster on any rubber, vinyl, leather or plastic surface. Many applications around the auto, boat, home and industry.

USES

- Rubber
- Vinyl
- Leather
- Plastic

DIRECTIONS

1. Shake can well.
2. Apply to a clean, dry surface. If surface is dirty, clean with a product like WellWorth's Surface Cleaner first.
3. Apply product in smooth even strokes. Keep the can moving while applying treatment. On most surfaces just spray and let dry. No wiping necessary. However, on vinyl, plastic or leather seats, we recommend allowing product to penetrate for several minutes before buffing with a clean, dry cloth.
4. In tight areas, or if less gloss is desired, Spray Satin™ may also be applied by first spraying onto a cloth or sponge and then spreading evenly over the surface.
5. For additional protection, more than one coat can be applied as often as needed to preserve and beautify.

PACKAGING

2001 - 16 oz.
Aerosol Can
12 Per Case

STORAGE

Do not store in temperatures above 120°F (50°C). Do not puncture, incinerate or burn can. Do not place near sources of heat.

SPECIFICATIONS

HEALTH	: 1	FLASH POINT	: Propellant; -40°F, Product; 0°F
