QUIKSTICK™ Spray Adhesive

DESCRIPTION

QuikStik™ professional spray adhesive forms a strong permanent bond when used to attach vinyl, leather, polyurethane and foam rubber to metal, wood, fabrics and other surfaces. Product works equally well in all temperature ranges. Although QuikStick™ becomes tacky almost instantly, the long bonding range allows repositioning up to 15 minutes later. May be used for permanent or temporary bonding.

USES

- Leather • Vinyl • Polyurethane • Foam Rubber • Metal • Wood • Fabrics, Etc.

DIRECTIONS

IMPORTANT: PRODUCT MAY AFFECT SOME PAINTS AND PLASTICS. PROTECT ADJACENT SURFACES FROM OVERSPRAY. 1. Shake can well. 2. Make certain both surfaces to be bonded are clean and dry. 3. Holding can about 8-12 inches away, spray QuikStick™ on both surfaces. Use short even strokes. 4. Allow a few minutes for product to become tacky before sticking surfaces together. If necessary, materials can be repositioned up to 15 minutes later. 5. When job is completed, clean valve by inverting can and spraying until only pressure escapes. 6. Any overspray or excess adhesive can be removed with either mineral spirits or alcohol. NOTE: When a temporary bond is desired, or when working on porous materials, spray only one side and attach.

STORAGE

Do not store in temperatures above 120°F (50°C). Do not puncture, incinerate or burn can. Keep away from heat, sparks or open flame.

SPECIFICATIONS

FLASH POINT : Propellant; -40°F, Product; -15°F
EVAPORATION RATE (Water = 1) : Faster
COLOR : Light Amber
ODOR : Characteristic Solvent Odor
SOLUBILITY IN WATER : None

HMIS HAZARD RATING			
0-Least	A-Goggles	HEALTH	3
1-Slight	B-Goggles, Gloves	FLAMMABILITY	4
