## KOOL WELL™ Super Radiator Conditioner

### DESCRIPTION

Antifreeze, just like other fluids in your vehicle, becomes depleted of essential additives over time if not properly maintained. Kool Well™ Radiator Conditioner not only replaces depleted inhibitors, but also adds a long lasting alkaline reserve to the coolant. Kool Well™ protects against pitting, scaling and other corrosion damage to the cooling system. Formula provides maximum heat transfer and protects all metal and aluminum parts in most cooling systems. Contains a water pump lubricant. Kool Well™ mixes safely with all antifreeze coolants, will not harm hose connections or metals in the cooling system when used as directed.

### USES

- Restores essential inhibitors in coolant.
- Prolongs Cooling System Life.

### DIRECTIONS

DO NOT REMOVE RADIATOR CAP WHEN ENGINE IS HOT. 1. With the engine off and cool, remove radiator cap. 2. Be certain water level is at least 2 inches below the overflow level. Shake bottle well. Add entire bottle of Kool Well™. Treats up to a 22 quart system. Replace radiator cap. Start engine and run for 10 minutes after reaching operating temperature to mix completely. For proper preventative maintenance, add every 6 months or when added protection is desired.

### STORAGE

No special handling procedures. Store at room temperature.

### PACKAGING

# 8004 - 12 oz. Bottle  
 24 Per Case  
 WW 19 K Kit  
 Kool Well, Stop Well,  
 Flush Well

### SPECIFICATIONS

FLASH POINT : Product; Not Determined  
 EVAPORATION RATE : < 1  
 (Butyl Acetate = 1)  
 COLOR : Light Red  
 ODOR : Odorless  
 SOLUBILITY IN WATER : Complete

### HMIS HAZARD RATING

0-Least	A-Goggles	HEALTH	2
1-Slight	B-Goggles, Gloves	FLAMMABILITY	0
2-Moderate	C-Goggles, Gloves,	REACTIVITY	0
3-High	Protective Wear	PERSONAL PROTECTION	B
4-Extreme			

### FIRST AID MEASURES

EYE CONTACT: Flush with large amounts of water for 15 minutes, holding eyelids open during flushing with water. Get medical attention. SKIN CONTACT: Wash with soap and water and then flush with water until all chemical is removed. Remove contaminated clothing promptly and wash before reuse. If irritation persists get medical attention. INHALATION: Remove to fresh air. If breathing has stopped, give artificial respiration, provided a qualified individual is available. If breathing is difficult, give oxygen, provided a qualified operator is available. Get prompt medical attention. INGESTION: If conscious, drink large amounts of water or acidic beverages (tomato or orange juice, carbonated soft drinks). DO NOT induce vomiting. Take immediately to hospital or physician. If vomiting occurs, give additional water. If unconscious, or in convulsions, take immediately to a hospital. DO NOT attempt to induce vomiting or give anything by mouth to an unconscious person. ChemTrec (USA) 800-424 9300.
