## STOP WELL™ Cooling System Sealer

### DESCRIPTION

Stop Well™ is a safe, fast way to seal most coolant system leaks. Stop Well's™ special blend of organic material quickly stops head gasket, water pump and thermostat gasket seepage as well as many radiator and engine block leaks. Stop Well™ is designed not to restrict coolant flow through heater cores, radiators or any coolant passage way. As a preventative measure, Stop Well™ should be added to the cooling system when the vehicle is new, or any time a water jacket repair is performed. Stop Well™ is compatible with all types and colors of coolant, and is not harmful to any metal, plastic or rubber parts. Stop Well™ can be flushed from the cooling system using Well•Worth's Flush Well™ Radiator Flush.

### USES

- Seals Leaks • Compatible With All Types of Coolant – Including Extended Life
- Prevents Leaks

### DIRECTIONS

DO NOT REMOVE RADIATOR CAP WHILE ENGINE IS HOT. 1. With the engine off and cool, remove radiator cap. 2. Shake well. 3. Make certain radiator is almost full. Start engine and bring engine up to operating temperature. 4. Pour in entire contents and allow to circulate until leak stops.

### STORAGE

Do not store in temperatures above 120°F (50°C). Keep away from heat, sparks or open flame.
