

FLUSH WELL™ Cooling System Super Flush

Directions:

DO NOT REMOVE RADIATOR CAP WHILE ENGINE IS HOT.

- 1. With the engine off and cool,remove radiator cap. Drain cooling system. Close drain and refill system with clean water.
- 2. Shake contents of FLUSH WELL™ and pour into cold radiator.
- 3. Replace radiator cap to closed position and start engine. Turn heater on and set controls to maximum settings. After engine has reached normal operating temperature, run engine between 10 and 30 minutes.
- 4. After radiator has cooled, drain system and flush with clean water until water draining from block and radiator is clear.
- Refill with anti-freeze, water and Well●Worth's Kool Well™ Radiator Conditioner, following label instructions.

NOTE: For use with power flush machines, follow equipment manufacturers instructions.
