

LIFE GUARD™ BATTERY PROTECTOR

Acid fumes escaping from the battery attach bare metal terminals, cable connectors, clamps, etc. forming corrosion that sucks power from the battery and eventually leads to a dead battery. LIFE GUARD™ stops this destructive process by eliminating corrosion build-up. Just spray on this distinctive purple coating to seal and protect batteries for months. Remains flexible at low temperatures and will not crack, chip or peel. Maintain full power and reduce voltage loss. Improves electrical contact.

Directions:

1. SHAKE CAN WELL BEFORE USING.
2. NEW BATTERIES: Hold can 10-12 inches from areas to be treated. Spray LIFE GUARD™ on battery posts, cables and carrier. For best results, spray two twin coats on terminals. To ensure proper current flow, be sure terminals are in place prior to treating.
3. OLDER BATTERIES: Use battery cleaning such as Well Worth's KLEEN SEEK™ to completely remove any corrosion build-up first. After all surfaces are clean, follow the same procedures for NEW BATTERIES.

Product Number and Packaging:

#3003 – Net wt. 10 oz. Aer.....12 per case

For complete product specifications, review the product SDS at wellworthproducts.com.

Storage:

Keep away from heat, sparks or open flame. Store at temperatures below 120°F (50°C). Do not puncture, incinerate or burn.

First Aid Measures:

- EYE CONTACT: Wash eyes with fresh water. If irritation continues, get medical attention.
- SKIN CONTACT: Wash skin with fresh water. If irritation continues, get medical attention.
- INHALATION: Remove to fresh air. Give oxygen. Get medical attention.
- INGESTION: Do not induce vomiting-gastric lavage. Get medical attention.
