

# QUIK STICK™ SPRAY ADHESIVE

QUIK STICK™ professional spray adhesive forms a strong permanent bond when used to attach vinyl, leather, polyurethane and foam rubber to metal, wood, fabrics and other surfaces. This product works equally well in all temperature ranges. Although QUIK STICK™ becomes tacky almost instantly, the long bonding range allows repositioning up to 15 minutes later. May be used for permanent or temporary bonding.

### Directions:

IMPORTANT: PRODUCT MAY AFFECT SOME PAINTS AND PLASTICS. PROTECT ADJACENT SURFACES FROM OVERSPRAY.

1. Shake can well.
2. Make certain both surfaces to be bonded are clean and dry.
3. Holding can about 8-12 inches away, spray QUIK STICK™ on both surfaces. Use short even strokes.
4. Allow a few minutes for product to become tacky before sticking surfaces together. If necessary, materials can be repositioned up to 15 minutes later.
5. When job is complete, clean valve by inverting can and spraying until only pressure escapes.
6. Any overspray or excess adhesive can be removed with either mineral spirits or alcohol.

NOTE: When a temporary bond is desired, or when working on porous materials, spray only one side and attach.

### Product Number and Packaging:

#3004 – Net wt. 13.25 oz. Aer.....12 per case

For complete product specifications, review the product SDS at [wellworthproducts.com](http://wellworthproducts.com).

### Storage:

Keep away from heat, sparks or open flame. Store at temperatures below 120°F (50°C). Do not puncture, incinerate or burn can.

### First Aid Measures:

- EYE CONTACT: Wash eyes with fresh water. If irritation continues, get medical attention.
- SKIN CONTACT: Wash skin with soap and fresh water. If irritation continues, get medical attention.
- INHALATION: Remove to fresh air. Give oxygen. Get medical attention.
- INGESTION: Do not induce vomiting-gastric lavage. Get medical attention.
