

QUIK STICK™ SPRAY ADHESIVE

QUIKSTICK™ professional spray adhesive forms a strong permanent bond when used to attach vinyl, leather, polyurethane and foam rubber to metal, wood, fabrics and other surfaces. Although QUIKSTICK™ becomes tacky almost instantly, the long bonding range allows repositioning up to 15 minutes later.

Directions:

IMPORTANT: Always mask off where over-spray may occur. May affect some painted surfaces.

1. Shake can thoroughly before and during use.
2. Make certain both surfaces to be bonded are clean and dry. Make certain temperature is above 60°F when applying Quikstick.
3. Holding can about 6-8 inches away, apply two uniform and overlapping coats on both surfaces to be joined.
4. Allow Quikstick to dry until tacky (1 to 3 minutes). Bond surfaces using firm and uniform pressure. Bond needs to be made within 15 minutes of Quikstick being applied.
5. When job is completed, clean valve by inverting can and spraying until only pressure escapes.
6. Any over-spray or excess adhesive can be removed with either mineral spirits or alcohol.

NOTE: When a temporary bond is desired, or when working on porous materials, spray only one side and attach.

Product Number and Packaging: #3004 – 12/CS

CONTAINS: Propane/Isobutane/N-butane, Petroleum Distillates, Methyl Acetate, Acetone, Cyclohexane.
